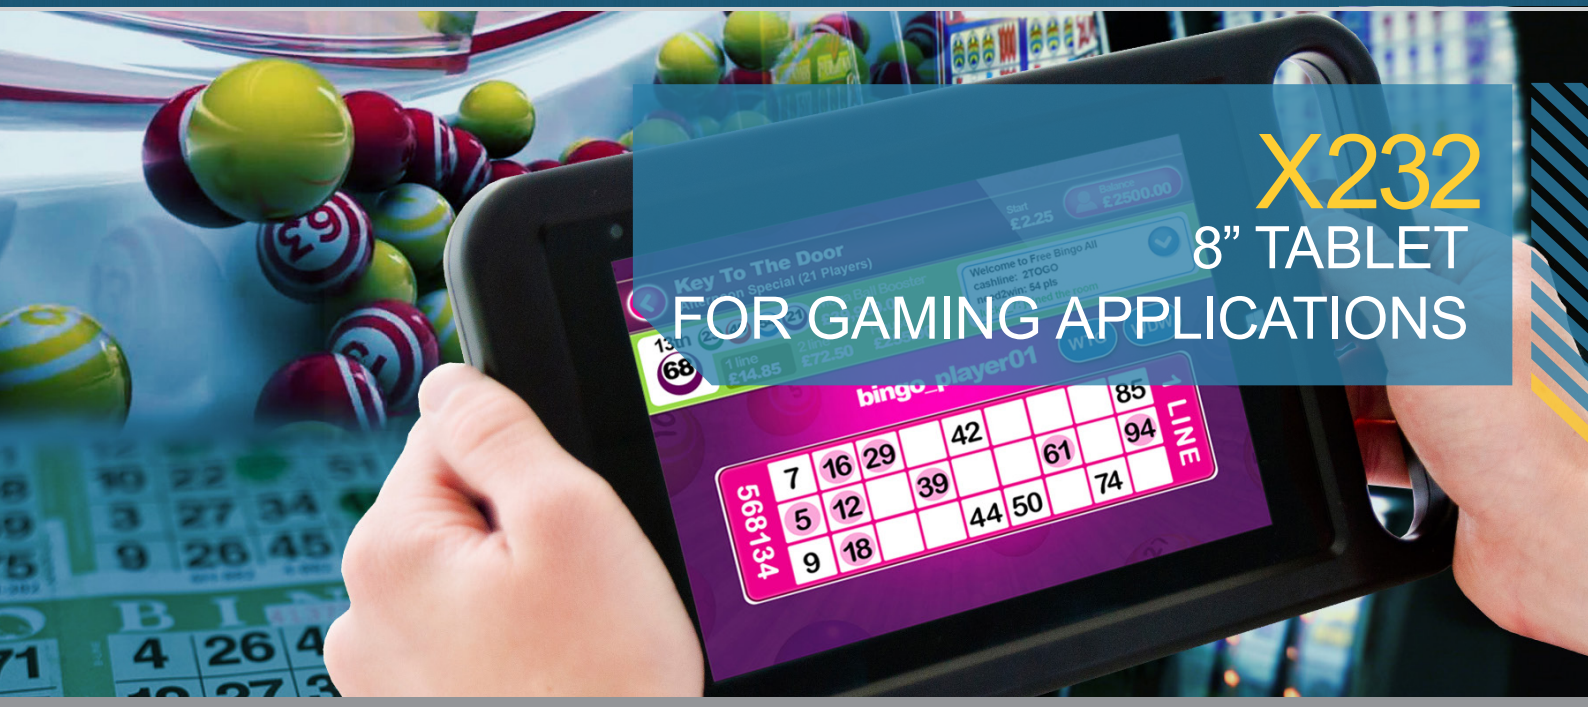
CAPTEC



X232
8” TABLET
FOR GAMING APPLICATIONS

KEY BENEFITS

- More powerful, next generation tablet delivers an enhanced gaming experience
- Keep tablets securely, simultaneously and continuously charged
- Extended batteries secure all-day game play without the need for regular recharging
- Specifically engineered for gaming and effortless to carry, position and use
- Secure reliability with tailored through-life managed servicing and support

Our slimmest, lightest and most powerful gaming tablet yet. The X232 is engineered for high performance to support, run and optimise land-based electronic gaming applications, including eBingo.

The addition of integrated handles and stands make them effortless to carry, position and use. Uninterrupted, all day game-play is achieved through lithium polymer and optional extended batteries. The X232 can be custom branded to meet the exact requirements of a venue. We offer bespoke service level agreements, tailored to the specific needs of each application. These include maintenance, support and repairs.
