

# EFC-206

## ULTRA COMPACT EMBEDDED COMPUTERS

### KEY BENEFITS

- ▶ Very small, but powerful embedded computers
- ▶ High reliability, fanless computers with no moving parts
- ▶ High performance from the latest generation Celeron quad core processor
- ▶ Wide temperature range
- ▶ Low power consumption

Extremely Compact, reliable and versatile fanless embedded computer providing high processing power with low power consumption. Rugged construction with multiple I/O connectivity makes this computer ideal for many applications where space is severely restricted such as machine automation, kiosks, access control or remote monitoring.
